

# RISK DETECTION SERVICE

## MANAGE FLEET RISK ON YOUR TERMS

Stay aware of risk across your fleet with the Risk Detection Service. Receive timely reports and video of driving events that are important to you, surfaced with unmatched precision, and delivered to you in minutes. Along with access to continual video, you'll have the right information to address fleet risk in the best way for your business.

- ✓ Award-winning MV+AI technology helps expose additional driving risk
- ✓ Easy-to-use reports and video help reveal driving risk
- ✓ Spot trends that contribute to fleet risk and take action as you see fit

### LYTX DRIVECAM® EVENT RECORDERS

Dashcams just capture video. DriveCam Event Recorders capture real risk.

Lytx Event Recorders are equipped with advanced sensors that collect and process data-driven video to analyze what's happening on the road and inside the vehicle. Engineered with award-winning MV+AI, these state-of-the-art devices are the first step in advanced risk detection, surfacing more risk than traditional telematics alone.

### MV+AI INSIGHTS THAT HELP YOU MONITOR RISK AND TAKE ACTION

Risk Detection Service uses Machine Vision and Artificial Intelligence (MV+AI) to constantly monitor your fleet and the road ahead to deliver risky driving behavior in a format that won't overwhelm you. Video labeled with important behaviors is delivered right to your Lytx account for you to address as you need.

### VIEW A SNAPSHOT OF RISK IN MINUTES

See what's happening at a glance from your Lytx account. Review events that highlight unsafe behavior. Or search up to 100 driving hours of continual video from the Lytx DriveCam® Event Recorder for more crucial context.

- Categorizes video events with MV+AI technology to surface risky driving
- Dashboard and insight reports give you a high-level view of what's happening with your fleet and your drivers
- Includes video support and all features of the Lytx Video Platform

### RELIABLE, FLEET-SPECIFIC MV+AI TECHNOLOGY

Advanced technology detects behaviors that are difficult to spot and gives you coaching tools that are proven to help minimize driving risk.

- MV+AI identifies risk with a high degree of confidence
- Highly-trained algorithms informed by over 100 billion driving miles
- MV+AI constantly scans, finds and categorizes risk

### INNOVATIONS DESIGNED FOR FLEET CHALLENGES

Achieve your unique goals with the breakthroughs modern fleets demand.

- A powerful combination of hardware, software, and data
- Shaped by over 20 years of experience identifying risk
- From a leader in video telematics, MV+AI analytics, and driver safety

### HOW DOES THIS SOLUTION HELP ME?

#### KNOW FASTER

Learn about the risky and distracted driving behavior inside the vehicle behaviors you care about in minutes,\* with the insights and video evidence you need—when you need them.

#### FOCUS ON WHAT MATTERS

Get a summary of key events, categorized by MV+AI and marked with behaviors that indicate risk, to help you decide where to direct your attention.

#### TRACK, MONITOR, MANAGE

Keep up with incidents of risk, watch out for patterns, and take corrective action whenever—and however—it makes sense for your fleet and business.

### SPOT AND ADDRESS FLEET RISK WITH THE RIGHT INSIGHTS AT THE RIGHT TIME
